

KC2300 Series

EMC Circular Backshell with iris spring termination for overall and individual wire screening

- Lightweight and compact backshell suitable for all standard circular connectors
- EMC to highest levels including TEMPEST
- Overall screening is provided by proven iris spring technology
- Individual screening with slotted tube and braid kit
- Ideal solution for fibre and mixed fibre and copper cable assemblies providing EMC screening and protection for the fibre
- No special tools are required and the system is easily reworked
- Teeth on backshell body mesh with connector teeth for positive lock.
- Blind teeth for increased EMC screening with internal taper for enhanced environmental sealing with the connector
- Additional environmental sealing of cable system by heat shrink boot to provide environmental seal that is equal to or higher than the IP rating of the connector
- Cable clamp options also available

N	WITHOUT CLAMP BARS

NOTES:

1. TUBE & BRAID KIT. OMIT IF NOT REQUIRED. PLEASE NOTE THAT TUBE & BRAID KITS ARE ONLY AVAILABLE FOR CABLE ENTRY SIZES 03 AND LARGER. BRAID WITHOUT TUBE CAN BE USED ON SIZE 02 TO TERMINATE INDIVIDUAL SCREENS. IF USING A KIT, DETERMINE THE CABLE ACCOMMODATION ENTRY SIZE FROM THE K1/K2 COLUMN IN TABLE 4. FOR MORE INFORMATION PLEASE CONSULT FACTORY.
2. WORKING LENGTH IN 12.7mm (0.5in) INCREMENTS. FOR EXAMPLE WORKING LENGTH 4 = 50.8mm (2in). MINIMUM WORKING LENGTH FOR KC2300 SERIES IS 2. (STRAIGHT BACKSHELLS ONLY – OMIT ON ANGLED VERSIONS).
